

Debunking Evolution Taught in Public Schools (Student Guide): A Six-Lesson Video-based Program for Christian Public School Students

This Student Guide is designed to be used with our Debunking Evolution Taught in Public Schools DVD (available on our website or through Christian retailers), which includes 12 videos to prepare students for evolution teaching in public schools. Together with our Debunking Evolution book, this set makes a six-lesson program that can be adapted for students between junior high and college, and facilitated by parents or youth leaders. Our program is based on a straight-forward view on Genesis, and is drawn from research conducted by leading Biblical Creation ministries. The six lessons include:

Lesson 1: Why is Creation-Evolution Training Important?

Lesson 2: Bible History Real or Fiction? Can we trust the Bible's account of history? The Age of the Earth, Dating Methods, and Evolution are also reviewed.

Lesson 3: Did Humans Evolve from Ape-like Creatures?

Lesson 4: Adaptation and Natural Selection

Lesson 5: Common Ancestors/Branching & Homology

Lesson 6: Fossils, Whales, and Extinction
