

True Ghost Stories and Yes Aliens Exist

Synopsis: Many people have had at least one unexplainable weird experience in their lifetime which is sometimes of a paranormal or supernatural kind. Even so, sightings of ghosts, apparitions, or as some say, spirits, or spooks are not usually an acknowledged part of our daily lives. This collection of perceived phenomenon also includes an account of three alien encounters of the third kind, the subsequent information given being a bonanza of specific data concerning aliens and alien technology. Whilst the list of things that go bump in the night might seem endless, the truth is out there and Maurice La Hern's contribution may assist others to find it. About the Author: Author Maurice La Hern has had no direct experience of ghost busters in haunted castles, the headless horseman, poltergeist, clanking chains or the black hooded monk as often listed in the metaphysical literature, he has however, personally experienced several unexplainable events that obviously belong to the paranormal and the supernatural sphere of metaphysics, and which merit a closer interest.
