

# The Economic Organization of East Asian Capitalism

East Asia's dynamic entrance into the global economy has provided a fruitful avenue for research in economic sociology. In this perceptive and timely volume, the authors theorize Asian capitalism and analyze the economic organization of East Asia. Presenting differing dimensions of a Weberian perspective, the authors first provide a theoretical grounding, then consider capitalism in East Asia comparatively, and finally contrast the economies of East Asia and Europe. The book shows how radically different social and cultural institutions can lead to economies that are organized in remarkably similar ways.
