

Cary Tennis has written a lot about death in his role as an advice columnist for Salon.com. It only stands to reason, since death is such a big problem, that lots of people would have questions about it. Hes never said he knew a whole heck of a lot more than other people about death or anything else. He just has a penchant for ruminating out loud which many people find soothing and helpful. And occasionally he will have a good suggestion, like write down what you are feeling, and take the next step, commonsense suggestions that gain added force when written down in a normal kind of language. So he has collected these columns in ebook form so you may have the enhanced experience of reading them all together.
